[illegible]

Ovulation induction- Oocyte retrieval – Embryo transfer

[illegible]

IUI CASES

[illegible]

Laparoscopy

[illegible]

Hysteroscopy

[illegible]

Details of individual cases

At least 3 cases per a week

Should include:

1. PCOS
2. Normal responder
3. Poor responder
4. Inf. With myoma
5. Endometriosis
6. Ovarian cyst
7. Tubal factor
8. Male cause of infertility.
9. Transfer of freezing embryo
10. Difficult or complicated oocyte retrieval
11. Difficult or complicated embryo transfer
12. Interesting laparoscopic finding
13. Interesting hysteroscopic finding
14. IUI

For each case:

- File No.
- Age
- Occupation
- Address
- Type of infertility: primary or secondary
- GPA
- Duration of infertility
- Causes of infertility
- No. of IUI trials
- NO. of ICSI trials
- Date of presentation

Cycle Day 2 or 3 finding:

Ultrasound findings:

- Size, shape and direction of the uterus, and endometrial thickness, any pathology like myoma or endometrial polyp,
- Size and texture (PCO or not) of both ovaries, size and number of each antral follicles, presence of ovarian cyst or chocolate cyst
- Hydrosalpinx or any abnormal free fluid

Hormonal assessment CD2: (FSH, LH,E2,Progestrone,Prolactin,TSH,Testosterone.

NB: Mention the available information for each woman

Type of protocols;

- Short agonist
- Short antagonist
- Long agonist

Drugs used for induction of ovulation:

- Types
- No. of injections;
- Days of stimulation;

Day od trigger.

- Endometrial thickness
- Size and no. of stimulated follicles
- E2 level

Drug used for trigger;

- HCG 5000 IU or 10000 IU
- Decapeprtyl 0.2 mg

Day of oocyte retrieval

- Anesthesia
- Position
- No. of oocytes retrieved
- Grading of oocyte
- No. of fertilization
- No. of embryos
- Notes

Day of embryo transfer;

- Position
- No of embryos transferred
- Notes

LUTEAL PHASE SUPPORT;

Pregnancy test

Ultrasound
